Applied Vision Shares Its Success, Has Another Record Breaking Year

AKRON, OH – [DATE] – Applied Vision Corporation, the leader in machine vision systems worldwide for the food and beverage industry, announced a record breaking year of growth for 2014. The company reported an increase in revenue of 20%; their largest in six years of consecutive gains.

Due to the success of their latest KromaKing line of color inspection systems, the company increased their workforce to keep pace with their expansion. Applied Vision's staff grew 20% during 2014, with key positions added at their Akron, Ohio headquarters and overseas locations.

Bonuses were distributed to Applied Vision employees at year end, based on 2014's gross profit margin. "We are proud of the success we've had," said Manijeh Novini, Chief Financial Officer of Applied Vision. "Our continued growth benefits both our employees and customers."

A special visitor from the local community delivered bonuses to Applied Vision employees. See <http://goo.gl/b1OTTp> to read more.

About Applied Vision Corporation

Applied Vision Corporation designs and manufactures application-specific machine vision inspection systems for the packaging, food and beverage container and color printing industries. Applied Vision systems are sold worldwide through original equipment manufacturers (OEMs), value-added resellers (VARs), full-service distributors and company direct. Visit www.appliedvision.com to learn why Applied Vision has been a pioneering and innovative developer of machine vision systems for glass and metal container, cap and closure, mixed label and color decoration inspection for more than three decades.
